PROFILE

Highly skilled and results-driven IT professional with over 11 years of hands-on experience in designing, developing, and maintaining robust backend systems. Adept at working with a diverse range of backend technologies, demonstrating versatility in delivering scalable solutions to meet business objectives.

WORK EXPERIENCE

Principal Engineer | HealthPlix Tech Pvt Ltd

July 2023 – Present | Bangalore, India

- Build Patient App backend system in GoLang from scratch and scaled it from 100 users to 10000 users in 1 month time span, this including overall system design, low level design, deployment process, CI/CD pipeline, development process etc
- Built a real-time notification system for patient app
- Setup the best practices among multiple pods like tech choices, best practices, branching strategies, deployment pipelines, caching, storage schemas etc
- Mentored and groom new engineers in the team time to time
- Member of the technical staff team responsible for driving the tech excellence into the company

Senior Software Engineer | Flyhomes Residential India Pvt Ltd

Oct 2021 – June 2023 | New Delhi, India

- Lead the backend team to deliver the features on top of existing ops tools
- Migration of services from monolith to microservices in Python using FastAPI.
- Improve code quality, query performance and existing schema design
- Built a video feed service from scratch which enabled Listing team to upload the videos feeds which then shown to the user on their mobile apps
- Actively involved in mentoring the junior members in the team, setting up the development process, infra management, code reviews etc

Lead Software Engineer | Moengage India Pvt Ltd

Nov 2018 – Aug 2021 | Bangalore, India

- Implement/enhanced various features single handedly in an ongoing project called Flows and scaled it from beta phase to production ready
- Built a real-time notification system for campaigns and reduced sending time from 2 mins to near real-time
- Redesigned event data processing Apache Samza job with Java design pattern to support different automated campaigns.
- Added support for the inapp campaigns and time based campaigns in Flows from scratch etc
- Lead the team of 5~6 person to deliver the rich feature set in Flows, mentored and groom them to deliver the best quality features

Software Development Engineer 2 | ANI Tech Pvt Ltd (OlaCabs)

July 2015 – Nov 2018 | Bangalore, India

- Implement/enhanced various driver APIs from i.e GoHome, Status Updated, Position Updates, login/logout, duty change APIs etc
- Implement a number masking service from end to end to mask the numbers from driver to customer
- Involved in redesign phase of whole driver app backend in which we migrated the whole code base from php to nodeJS
- Worked on day to day product requirements and involved in the whole SDLC life cycle i.e Requirement Gathering, Design, Implementation, Reviews, Deployment.

Software Engineer | Veritas Technologies LLC (Symantec)

June 2012 – June 2015 | Pune, India

- Involved in developing and delivering multiple modules like Volume Management, File System Management, System Configuration Management on top of Symantec SFHA Stack for NAS Appliance.
- Involved in Quality Assurance for multiple modules and ensuring No Bugs.
- Maintaining and enhancing the feature set related to storage and associated areas of Symantec FileStore product.

- Worked in Hadoop echo-system to make Hadoop and related products work with Symantec Storage Foundation Cluster File System (SFCFS).

SKILLS

Programming	Java, Python, GoLang
Frameworks	Flask, FastAPI, Dropwizard, Apache Samza, Celery, Express, Airflow etc
Storage and Caches	MySql, PostgreSQL, MongoDB, Redis, Kafka, ElasticSearch
Misc	Git, REST, AWS, LINUX, SQS, Agile, CI/CD etc

EDUCATION

Indian Institute of Technology Roorkee	MCA – 2012 | CGPA: 7.54/10
Vikram University, Ujjain	B.Sc (CS) – 2008 | CGPA: 68%

COURSEWORK

Data Structure and Algorithm • Object Oriented Programming • Design Patterns • Low & High Level Designs • DBMS • System Design
